MIRRORS

DAGLASS offers ceramic printed glass with the use of screen printing method. **This technique guarantees high-end quality print all over glass surface, with the possibility of choosing from a wide range of patterns and colour palette.** At the same time ensures high mechanical resistance and adhesion between the print and the glass.

DAGLASS is also an owner of a highly effective painting robot, which provides quick and smooth coating using resin, water, or ceramic paints. **Coloured glass is thermally tempered. Any mechanical processing - cutting, polishing, grinding, and drilling holes - is possible only before tempering.** It ensures glass' high mechanical and temperature resistance.

We offer all colours possible from the RAL pallet. According to the client's wish, we can match the colour to the delivered template and **perform such elements as colour blends or frames on the glass.** With many years of experience in glass printing, the constant development of the machine park, and testing new solutions, **we aim to perfectly adapt DAGLASS's production to our customers' needs.**

# TECHNICAL DATA

## Coloured/Printed Glass

### Coloured with ceramic paints (UV resistant)

Available/Possible dimensions	2900 x 1900
Available/Possible thicknesses	4 – 19 mm

### Coloured with resin paints

Available dimensions	3200 x 2200
Available thicknesses	4 – 19 mm

## Coloured by screenprinting

Available dimensions	2500 x 1200
Available thicknesses	4 – 19 mm

Prints can be performed on every type of glass - standard float, anti-reflective, NONGLARE, anti-septic, NANO-BARREN™, diffused, or diamond.

# **Coloured/Printed Glass applications**

## COLOURED/PRINTED GLASS

Coloured glass may be applied almost everywhere - from interior design and furnishings, small decorative elements, to modern building glass. It is frequently used in exterior architecture, especially coloured facades, glass balustrades, or other glazings, additionally ensuring sun protection.

The image shows a modern interior space, likely a dining or meeting area, viewed through a large, sliding glass door. The door is partially open, revealing a bright, airy room with a large window on the right side. Inside, there is a wooden dining table with several chairs. A pendant light hangs from the ceiling. The walls are made of dark, textured bricks. The floor is a light-colored, polished material. The overall atmosphere is clean, minimalist, and professional.

## INTERIOR ARCHITECTURE

- Decorations and furnishings
- Partition walls
- Wall cladding
- Elevator shafts

**DECORATIONS AND FURNISHINGS**

**PARTITION WALLS**

**WALL CLADDING**

**ELEVATOR SHAFTS**

A modern building facade featuring a mix of balcony types. Some balconies have bright yellow glass railings, while others have dark metal railings. The building has large windows and a clean, geometric design. The text 'EXTERIOR ARCHITECTURE' is overlaid on the left side, followed by a bulleted list of architectural features.

## EXTERIOR ARCHITECTURE

- Railings
- Glass floors and platforms
- Glass facades of buildings
- Glass roofing and skylights
